

## **Texana Groundwater Conservation District**

### **Annual Report of the District Fiscal Year 2019 – 2020 October 1, 2019 to September 30, 2020**

#### **Section 1 - Review of management goals, objectives and performance standards of the District.**

The Management Plan of the District ([TGCD - Management Plan](#)), as adopted on May 17, 2018, specifies the method for tracking progress in achieving the goals of the District. The management plan states "staff of the DISTRICT will prepare and present an annual report to the Texana Groundwater Conservation Board of Directors regarding the DISTRICT's performance in achieving management goals and objectives for the fiscal year. The report will be presented within 120 days following the completion of the DISTRICT's fiscal year. The DISTRICT will maintain the report on file for public inspection at the District's offices upon adoption at a meeting of the Texana Groundwater Conservation Board of Directors."

Based on the review of the activities and projects of the Texana Groundwater Conservation District Management Plan between October 1, 2019 and September 30, 2020, the District has determined that all of the goals and associated objectives, based on an assessment of the performance standards, have been fully achieved the fiscal year ending September 30, 2020.

#### **Goal 1: Providing the most efficient use of groundwater – TWC §36.1071(a)(1) and 31 TAC 356.52(a)(1)(A)**

Objective G1O1: Develop and maintain a water well registration program for tracking well information for wells within Jackson County.

Performance Standard: Each year, the DISTRICT will summarize within the annual report the changes related to water well registration including the number of non-grandfathered and grandfathered wells registered.

The District provided for the efficient use of groundwater by maintaining a water well registration program for tracking well information for wells within Jackson County. The District registered 34 non-grandfathered wells and 11 grandfathered wells in FY2020.

Number of non-grandfathered wells registered with the District as of October 2019: 481 wells  
Number of non-grandfathered wells registered with the District as of September 2020: 515 wells

Number of grandfathered wells registered with the District as of October 2019: 546 wells Number of grandfathered wells registered with the District as of September 2020: 557 wells

#### **Achievement Level: FULL**

Objective G1O2: Develop and maintain a water well permitting program for processing and tracking all permits authorizing groundwater production.

Performance Standard: Each year, the DISTRICT will summarize within the annual report the changes related to water well permitting including the number of new applications and the disposition of the applications.

The District provided for the efficient use of groundwater by maintaining a water well permitting program for processing and tracking all permits authorizing groundwater production within Jackson County.

The District initiated 12 permitting request cases related to groundwater production permits during the fiscal year. The District received 14 permitting applications related to groundwater production permits during the fiscal year.

The District approved 10 production permits and no production permit renewals during the fiscal year.

The total volume of permitted groundwater production for the permits totals 132,232.012 acre-feet per year for non-aggregate production permits. The total volume of permitted groundwater production for the permits totals 31,751.030 acre-feet per year for aggregate production permits.

**Achievement Level: FULL**

**Goal 2: Controlling and preventing waste of groundwater – TWC §36.1071(a)(2) and 31 TAC 356.52(a)(1)(B)**

Objective G2O1: Develop and maintain a water well inspection program for non-exempt wells.

Performance Standard: Each year, the DISTRICT will summarize within the annual report the findings of the inspection activities including information regarding the number of wells that require improvement to control or prevent waste of groundwater.

The District addressed controlling and preventing waste of groundwater by maintaining a water well inspection program during the fiscal year. The District has performed 33 well inspections during the fiscal year. Of those wells inspected, none of the wells require improvement to control or prevent waste of groundwater.

**Achievement Level: FULL**

**Goal 3: Addressing conjunctive surface water management issues – TWC §36.1071(a)(4) and 31 TAC 356.52(a)(1)(D)**

Objective G3O1: Participate in the regional water planning process by attending at least one Lavaca Regional Water Planning Group (Region P) meeting per year.

Performance Standard: Each year, the DISTRICT will summarize within the annual report the representatives of the DISTRICT, dates, and the number of meetings of the Lavaca Regional Water Planning Group attended.

The District addressed conjunctive surface water management issues by, through the attendance of meetings by district directors, participating in the regional water planning process by attending at least one Lavaca Regional Water Planning Group (Region P) meeting during the fiscal year. Mr. Skalicky attended meetings of the Lavaca Regional Water Planning Group (Region P) on the following dates:

- Region P Meeting on January 20, 2020
- Region P Meeting on February 10, 2020
- Region P Meeting on August 24, 2020

**Achievement Level: FULL**

**Goal 4: Addressing natural resource issues which impact the use and availability of groundwater, and which are impacted by the use of groundwater – TWC §36.1071(a)(5) and 31 TAC §356.52(a)(1)(E)**

Objective G4O1: Develop and maintain a water quality monitoring program.

Performance Standard: Each year, the DISTRICT will summarize within the annual report the monitoring activities including the number of wells monitored and the year-to-year change of water quality.

The District addressed natural resource issues which impact the use and availability of groundwater by maintaining a water quality monitoring program during the fiscal year. The District processed 72 separate water quality field measurements and no water quality lab measurements in the fiscal year. The District continues to collect valuable aquifer measurement to support the future assessment of water quality change; based on a review of the water quality information a significant change in water quality was not identified.

The District collected field measurements for total dissolved solids from 10 wells during 2020. The average total dissolved solids field measurement in year 2019 was 0.751 g/L. The average total dissolved solids field measurement in year 2020 was 3.602 g/L. The range of total dissolved solids from wells with multiple measurements between year 2012 to year 2020 was 0.139 g/L (139 mg/L TDS). The change in total dissolved solids in wells measured in year 2019 and year 2020 is -0.099 g/L.

**Achievement Level: FULL**

**Goal 5: Addressing drought conditions – TWC §36.1071(a)(6) and 31 TAC 356.52(a)(1)(F)**

Objective G5O1: Collect and review drought condition information related to Jackson County and the surrounding region of Texas.

Performance Standard: Each year, the District will summarize within the annual report the drought condition information collected and reviewed.

The District addressed drought conditions by collecting and reviewing drought condition information related to Jackson County and the surrounding region of Texas by considering drought monitoring index information during meetings of the Board of Directors during the fiscal year. Drought condition information was reviewed at the meetings held in the following months: October 2019, November 2019, January 2020, February 2020, May 2020, June 2020, August 2020.

**Achievement Level: FULL**

**Goal 6: Addressing conservation, recharge enhancement, rainwater harvesting, precipitation enhancement, or brush control, where appropriate and cost-effective – TWC §36.1071(a)(7) and 31 TAC 356.52(a)(1)(G)**

Objective G6O1: Promote conservation, rainwater harvesting or brush control within Jackson County.

Performance Standard: Each year, the DISTRICT will summarize within the annual report the activities directly related to conservation, rainwater harvesting or brush control including participation in scientific investigations and studies, educational materials developed and delivered to local schools, cooperative educational contributions and grants, public speaking events and presentations, community event participation, and educational publications.

The District addressed and promoted conservation, recharge enhancement, rainwater harvesting, precipitation enhancement, or brush control by participating in scientific investigations and studies, public speaking events and presentations at community events. The District attended and operated an information booth at the South Texas Farm and Ranch Show in October 2019 at which promotional materials relating to groundwater conservation, recharge enhancement, rainwater harvesting and brush control were on display and distributed to show attendees.

**Achievement Level: FULL**

**Goal 7: Addressing the desired future conditions adopted by the district under Section 36.108 – TWC §36.1071(a)(8) and 31 TAC 356.52(a)(1)(H)**

Objective G7O1: Develop and maintain a water level monitoring program.

Performance Standard: Each year, the DISTRICT will summarize within the annual report the water level monitoring activities including the number of wells monitored and the year-to-year change of water level.

The District addressed the desired future conditions adopted by the District by maintaining a water level monitoring program during the fiscal year. The District collected 214 separate water level measurement from water wells within Jackson County during the fiscal year. An analysis of water level measurements stored within the District's databases produced the following tables.

Table A. The following table displays the average water level (feet below the surface) by year for all wells with water level measurements within Jackson County in the District's database. The average water level of wells measured in year 2000 was 45.2 feet below the surface. The average water level of wells measured in year 2020 was 33.9 feet below the surface.

Year	Count of Measurements	Avg. Water Level (Depth Below Surface in feet):
2000	32	45.2
2010	27	38.1
2013	3	44.1
2014	45	42.5
2015	53	39.1
2016	48	41.8
2017	52	38.1
2018	71	36.4
2019	54	33.1
2020	214	33.9

#### **Achievement Level: Full**

Objective G7O2: Analyze water level monitoring information to evaluate water level trends and determine the degree to which the DISTRICT is complying with the desired future conditions of Gulf Coast Aquifer in Jackson County.

Performance Standard: Each year, the DISTRICT will summarize within the annual report the water level trends and the conclusions regarding the DISTRICT's compliance with the desired future condition of the Gulf Coast Aquifer in Jackson County.

The District estimates that the average water level of the Gulf Coast Aquifer within Jackson County has recovered by 2 feet between the year 2000 and the year 2020.

The desired future condition for Jackson County is stated as follows: "Drawdown of the Gulf Coast Aquifer System shall not exceed an average of 15 feet in December 2069 from estimated year 2000 conditions."

Based on a comparison of the water level trends (2 foot recover) to the desired future condition of the Gulf Coast Aquifer in Jackson County (15 foot average drawdown at year 2069), the District concludes that the condition of the Gulf Coast Aquifer within Jackson County is in compliance with the District's desired future condition.

#### **Achievement Level: FULL**

**Section 2 - Evidence of Achievement**

**Goal 1: Providing the most efficient use of groundwater** - TWC §36.1071(a)(1) and 31 TAC 356.52(a)(1)(A)

Objective G1O1: Develop and maintain a water well registration program for tracking well information for wells within Jackson County.

Evidence of Achievement:

Last Well Registration Certificate Created in FY2019

1. Non-Grandfathered Well: [TGCD - GMa - Pe - Well Registration Certificates - WRC - NW-00481 - Darrell and Janet Ferguson - 20190916](#)
2. Grandfathered Well: [TGCD - GMa - Pe - Well Registration Certificates - WRC - GW-00546 - 20190926](#)

Last Well Registration Certificates Created in FY2020

1. Non-Grandfathered Well: [TGCD - GMa - Pe - Well Registration Certificates - WRC - NW-00515 - 20200904](#)
2. Grandfathered Well: [TGCD - GMa - Pe - Well Registration Certificates - WRC - GW-00557 - 20200812](#)

Objective G1O2: Develop and maintain a water well permitting program for processing and tracking all permits authorizing groundwater production.

Evidence of Achievement:

**Goal 5: Addressing drought conditions** - TWC §36.1071(a)(6) and 31 TAC 356.52(a)(1)(F)  
Objective G5O1: Collect and review drought condition information related to Jackson County and the surrounding region of Texas.

Evidence of Achievement:

Meeting Minutes for meetings held during FY2020 in which drought conditions were considered:

- [1. TGCD - Adm - MM - Meeting Minutes - 20191017 - Board of Directors](#)
- [2. TGCD - Adm - MM - Meeting Minutes - 20191121 - Board of Directors](#)

- [7. TGCD - Adm - MM - Meeting Minutes - 20200618 - Board of Directors](#)
- [8. TGCD - Adm - MM - Meeting Minutes - 20200820 - Board of Directors](#)

**Goal 6: Addressing conservation, recharge enhancement, rainwater harvesting, precipitation enhancement, or brush control, where appropriate and cost-effective - TWC §36.1071(a)(7) and 31 TAC 356.52(a)(1)(G)**

Objective G6O1: Promote conservation, rainwater harvesting or brush control within Jackson County.

Evidence of Achievement:

Participation Acknowledgment Forms and related materials for conservation-related events during FY2020

VCGCD - Participation Ack Form - STFRS 2019 - Signed.pdf

VCGCD - South Texas Farm and Ranch Show 2019 Packet .pdf

**Goal 7: Addressing the desired future conditions adopted by the district under Section 36.108 - TWC §36.1071(a)(8) and 31 TAC 356.52(a)(1)(H)**

Objective G7O1: Develop and maintain a water level monitoring program.

Evidence of Achievement:

## VICTORIA COUNTY GROUNDWATER CONSERVATION DISTRICT

### Public Notice

Public notice is hereby given in accordance with Chapter 551 (V.T.C.A.) Texas Open Meetings Act that directors of the Victoria County Groundwater Conservation District may attend and staff the District's educational booth at the 2019 South Texas Farm and Ranch Show, at the Victoria Community Center, 2905 East North St., Victoria, Texas, 77901 on October 23, 2019 and October 24, 2019 for the sole purpose of receiving public input regarding matters related to management of groundwater resources of Victoria County. A quorum of the Board of Directors will not take any action at the 2019 South Texas Farm and Ranch Show.

### VICTORIA COUNTY GROUNDWATER CONSERVATION DISTRICT 2018 WATER LEVEL EVALUATION – CHICOT AND EVANGELINE AQUIFERS

## 1.0 EXECUTIVE SUMMARY

Golder Associates Inc. (Golder) was retained by the Victoria County Groundwater Conservation District (VCGCD) to continue to evaluate water-level data for the central portion of the Gulf Coast Aquifer System. A series of maps were generated that show the potentiometric (water-level) surface of groundwater within the aquifer and changes in the potentiometric surface relative to a baseline condition (i.e., the potentiometric surface in the year 2000).

## 2.0 DATA SOURCES

The VCGCD provided tabulated water-level data (2000-2017) for the Gulf Coast aquifer to be used for this project. The VCGCD obtained the data from the Texas Water Development Board Groundwater Database. In order to account for seasonal variability and minimize the effects of utilizing unverified data, the VCGCD filtered the available data prior to delivery. The VCGCD filtered the water-level data to the measurements with the following attributes: 1) measurements collected from wells with known completion depths; 2) measurements collected from wells completed in the Chicot or Evangeline aquifers; 3) measurements collected between the months of January and March; and 4) measurements with a status coded as "publishable". The measurements of depth to water were primarily collected from observation wells through the use of an electric/steel tape, pressure transducer, or airline. The water-level data contained water-level elevations that appear to be calculated as the difference between the land surface elevation and the depth to water measurement. Golder obtained the 2018 water-level data from the Texas Water Development Board Groundwater Database. The water-level data was filtered and processed to follow the data schema utilized in the previous analysis described above.

RE: DFC; NATURAL RESOURCES (SUGAR); EFFICIENT USE OF G.W.

## TECHNICAL MEMORANDUM

DATE October 23, 2018

Project No. 30403161B

TO Mr. Tim Andruss, General Manager  
Victoria County Groundwater Conservation District

FROM Matthew K. Wickham, P.G. - Golder Associates Inc.

### VICTORIA COUNTY GROUNDWATER CONSERVATION DISTRICT WATER LEVEL EVALUATION – CHICOT AND EVANGELINE AQUIFERS

#### 1.0 EXECUTIVE SUMMARY

Golder Associates Inc. (Golder) (formerly Pastor, Behling & Wheeler, LLC) was retained by the Victoria County Groundwater Conservation District (VCGCD) to evaluate water-level data for the central portion of the Gulf Coast Aquifer System. A series of maps were generated that show the potentiometric (water-level) surface of groundwater within the aquifer and changes in the potentiometric surface relative to a baseline condition (i.e., the potentiometric surface in the year 2000).

#### 2.0 DATA SOURCES

The VCGCD provided tabulated water-level data for the Gulf Coast aquifer to be used for this project. The VCGCD obtained the data from the Texas Water Development Board Groundwater Database. In order to account for seasonal variability and minimize the effects of utilizing unverified data, the VCGCD filtered the available data prior to delivery. The VCGCD filtered the water-level data to the measurements with the following attributes: 1) measurements collected from wells with known completion depths; 2) measurements collected from wells completed in the Chicot or Evangeline aquifers; 3) measurements collected between the months of January and March; and 4) measurements with a status coded as "publishable". The measurements of depth to water were primarily collected from observation wells through the use of an electric/steel tape, pressure transducer, or airline. The water-level data contained water-level elevations that appear to be calculated as the difference between the land surface elevation and the depth to water measurement.

#### 3.0 METHODS

The 2000-2017 potentiometric-surface maps, water-level change (drawdown) maps, and hydrographs were created through the use of a geographic information system (GIS). A summary of the analysis extent, contour interval, measurement year, and aquifer data queried for each generated map is shown in Appendix A, Table 1.

## About the District . . .

The Calhoun County Groundwater Conservation District (DISTRICT) was created by Senate Bill 1290, 82nd Legislature and continued by Senate Bill 1835. 83rd Legislature, and codified as Chapter 18860, Special District and Local Laws Code. The citizens of Calhoun County through a confirmation election held on November 4, 2014 ratified the DISTRICT. The boundaries of the DISTRICT are conterminous with those of Calhoun County, Texas. The DISTRICT was formed to protect, conserve, and prevent waste of the groundwater resources under its jurisdiction, the DISTRICT is charged with the rights and responsibilities specified in its enabling legislation: the provisions of Chapter 36 of the Texas Water Code; this Management plan, and the District Rules.

# REFUGIO GROUNDWATER CONSERVATION DISTRICT

[Home](#)[Policies And Rules](#)[Forms](#)[Contact](#)

## FUTURE MEETING OF THE REFUGIO GROUNDWATER CONSERVATION DISTRICT

**Date:** October 14, 2019

**Time:** 6:00 PM

**Location:** District Office, 604 Commerce St, Refugio, Texas 78377

**Meeting Notice:** [PDF](#)

## DISTRICT MISSION

The mission of the Refugio Groundwater Conservation District (DISTRICT) is to develop sound water conservation and management strategies designed to conserve, preserve, protect, and prevent waste of groundwater resources for long-term sustainability within Refugio County for the benefit of Refugio County's landowners, citizens, economy, and environment.

The DISTRICT will implement these strategies through the acquisition and dissemination of hydrogeological information, the development of programs and incentives to conserve and protect groundwater resources, and the adoption and enforcement of fair and appropriate District rules governing the production and use of the groundwater resources within the District.

## ABOUT THE DISTRICT

The DISTRICT was created by Senate Bill 1911, 76th Legislature and continued by House Bill 2046, 77th Legislature, and codified as Chapter 8854, Special District and Local Laws Code. The citizens of Refugio County through a confirmation election held on November 6, 2001 ratified the DISTRICT. The boundaries of the District are conterminous with those of Refugio County, Texas. The DISTRICT was formed to protect, conserve, and prevent waste of the groundwater resources beneath the area of Refugio County. To manage the groundwater resources under its jurisdiction, the DISTRICT is charged with the rights and responsibilities specified in its enabling legislation; the provisions of Chapter 36 of the Texas Water Code; this Management Plan, and the District Rules.

The Refugio Groundwater Conservation District Board of Directors consists of five members. These five directors are elected by the voters of Refugio County and serve a four-year term. The DISTRICT observes the same four precincts as the Refugio County Commissioners' with one at-large position. Director terms are staggered on a two-year election interval in even numbered years.

The DISTRICT has the rights and responsibilities provided in Chapter 36 of the Texas Water Code and Chapter 356 of Title 31 of the Texas Administrative Code. The DISTRICT has the authority to undertake hydrogeological studies, adopt a management plan, provide for the permitting of certain water wells, and implement programs to achieve statutory requirements. The DISTRICT has rule-making authority to implement its policies and procedures to manage the groundwater resources of Refugio County.

Notice of Permit Issuance

Notice is given in accordance with Rule 4.7: Decision and Issuance of Permits of the Rules of the District that the Texana Groundwater Conservation District proposes to issue production permits, on October 28, 2019, authorizing the operation of grandfathered well to be used to produce groundwater for non-exempt uses.

Mr. Candido Saenz seeks an operating permit requested, under application AOW-20191001-03, authorizing groundwater production for RV Park and home uses. The subject well, GW-00547, is located on an 8-acre tract of land located near the intersection of CR 432 and CR 426, Jackson County, Texas. The requested production amount is 4 acre-feet per year.

Any person who intends to contest a permit application must provide written notice of that intent to the District at post office box P.O. Box 1098, Edna, Texas 77957 at least three calendar days prior to the proposed date of permit issuance as published in this public notice. If the District does not receive a timely notice of intent to contest, the District may cancel the permit hearing. The Board of Directors may consider and take

# Geostatistical Technique to Assess and to Evaluate Changes in Water Levels

A Presentation  
to

January 21, 2021

# Project Work Flow

## ■ Data Collection of Measured Water Levels

- Assemble GCD and TWDB Water Levels from 1995 to 2000
- Integrate TWDB and GCD water levels into a single data set
- Assign wells to the Chicot and Evangeline Aquifer
- Develop hydrographs of water levels (WL)

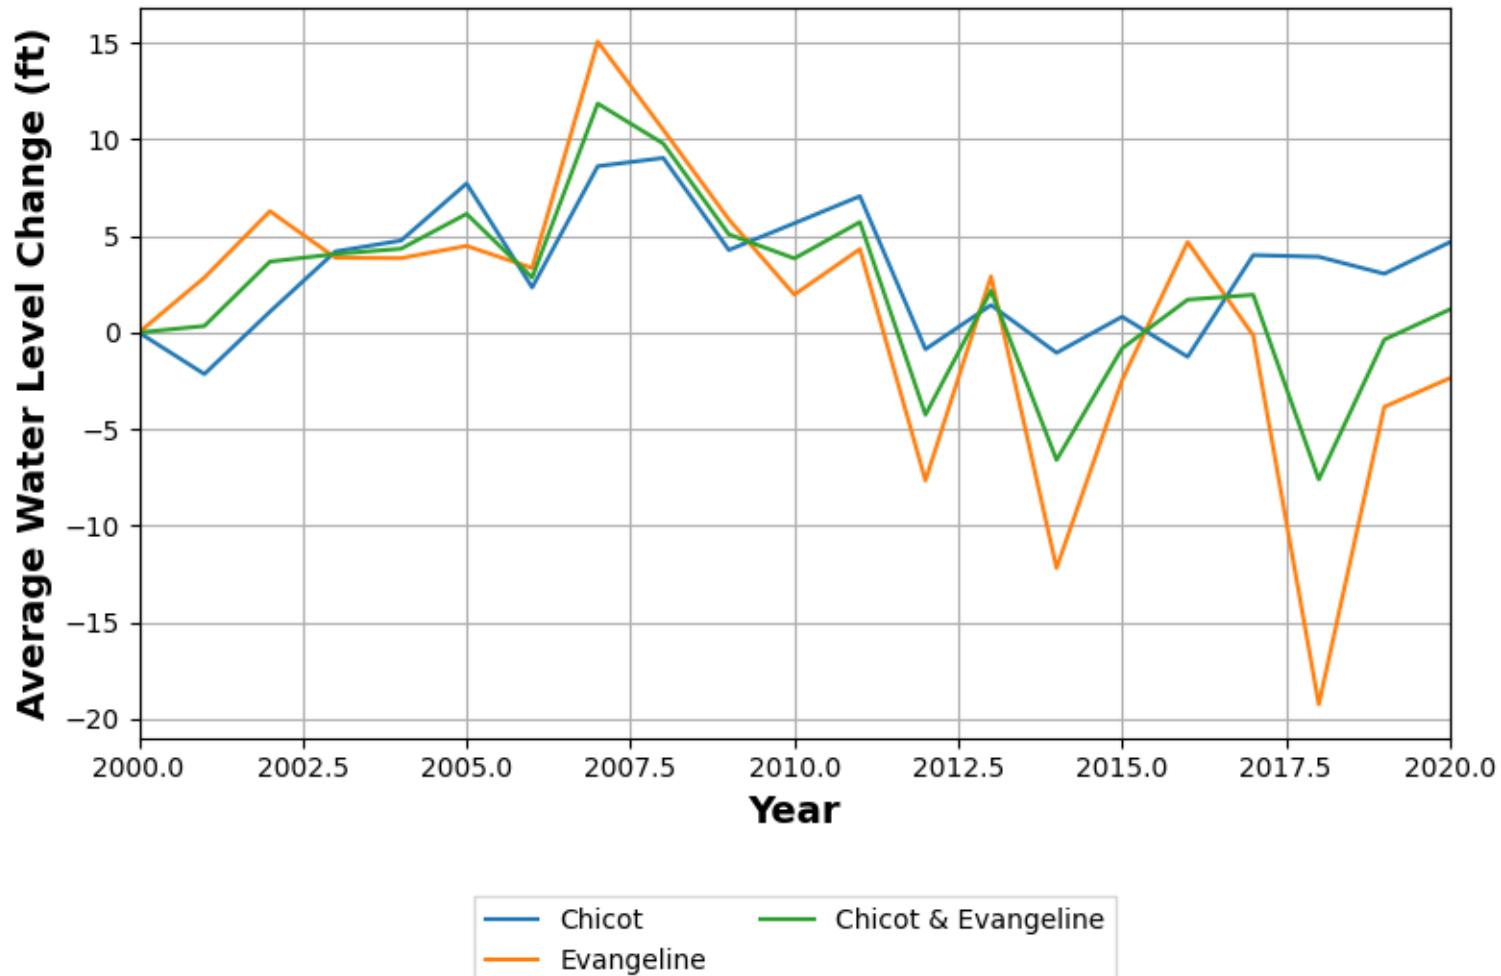

## ■ Generate Water Level Contours for Chicot and Evangeline Aquifers

- Estimate a trend in the Gulf Coast water levels using smoothed water levels from the Groundwater Availability Model
- Calculate difference between measured and modeled water level (WL)  
$$WL\ Residual = Measured\ WL - Predicted\ WL$$
- Perform geostatistics using WLs and WLs residuals to generate WL contours

## ■ Determine Water Level Change

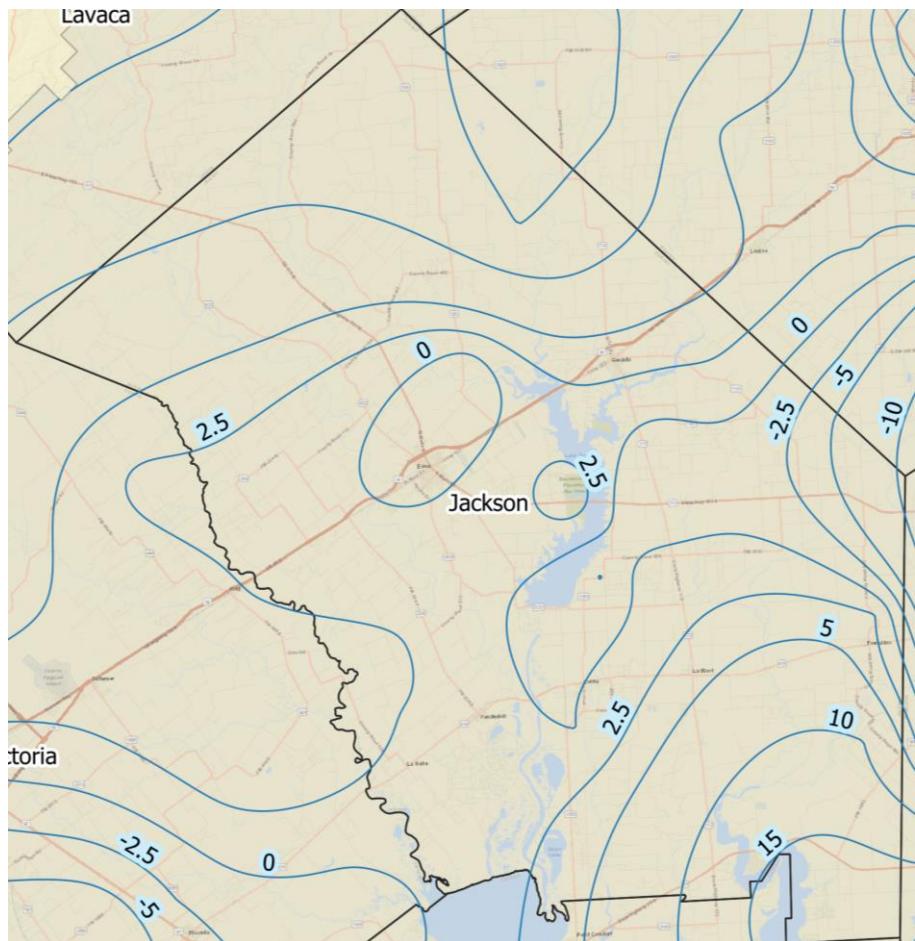

- Calculate average water by aquifer and by year (2000 to 2020)
- Evaluate results and select most appropriate analysis

# Water Level Change Over Time

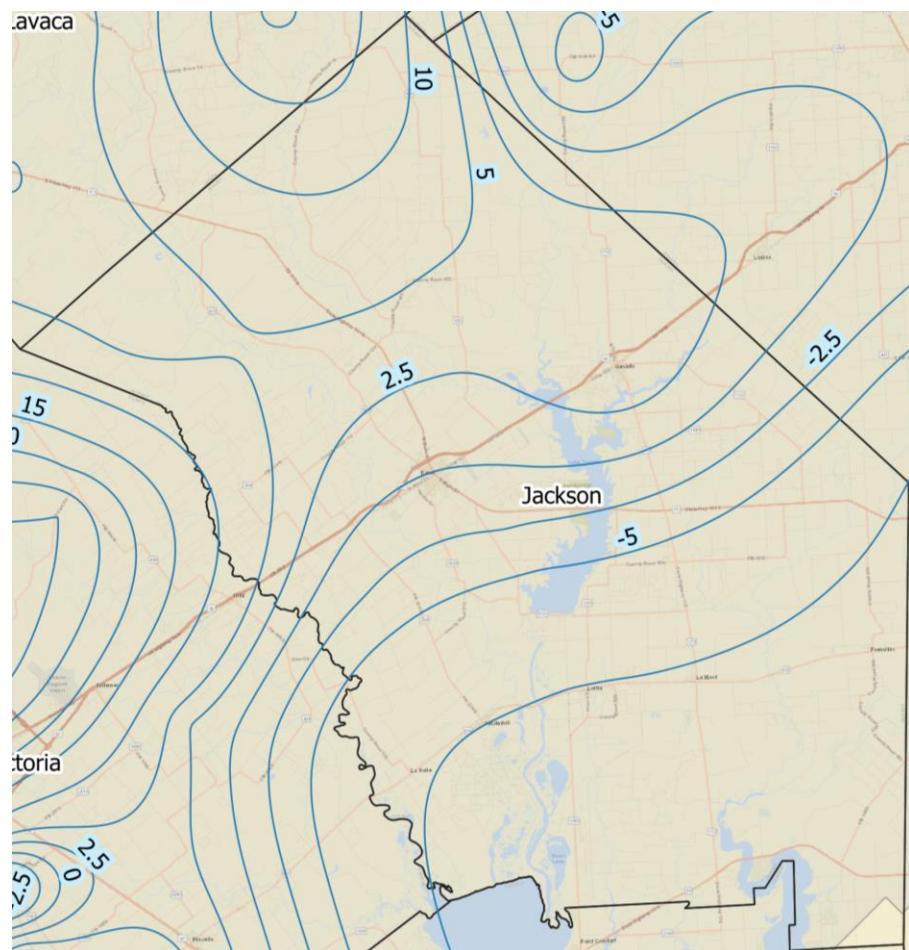

# Averaged Change in Water Levels from 2000 to 2020

Chicot

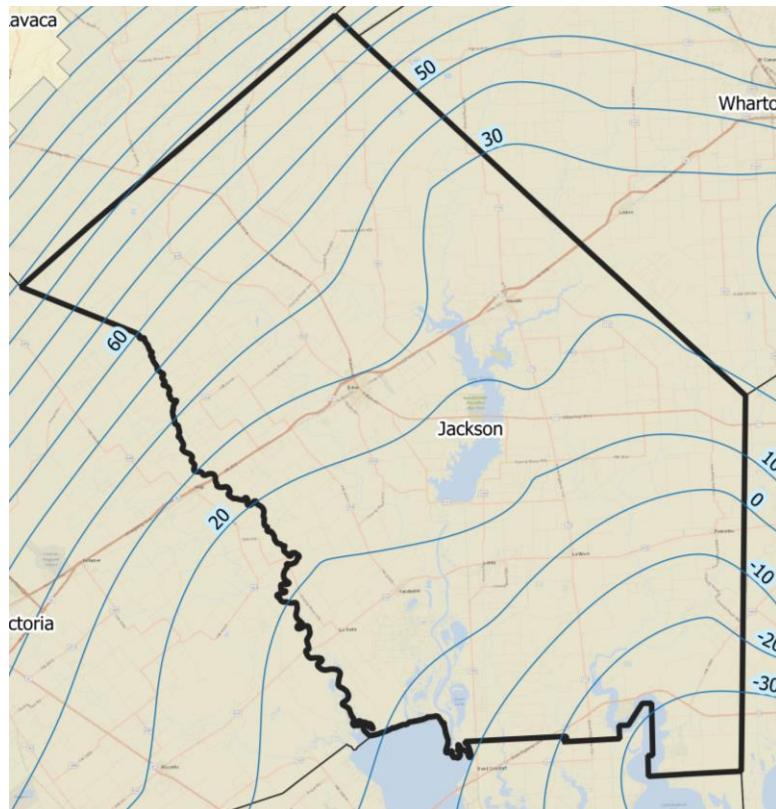

Evangeline

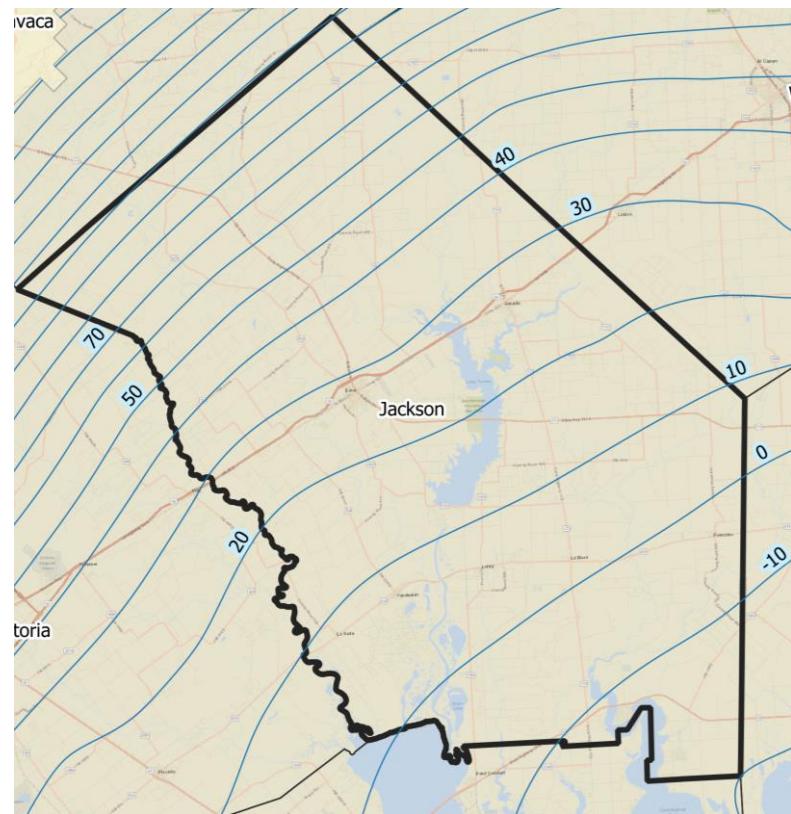

Note: positive number indicates a rebound in water levels since 2000

# Contoured Water Levels for Chicot

2000

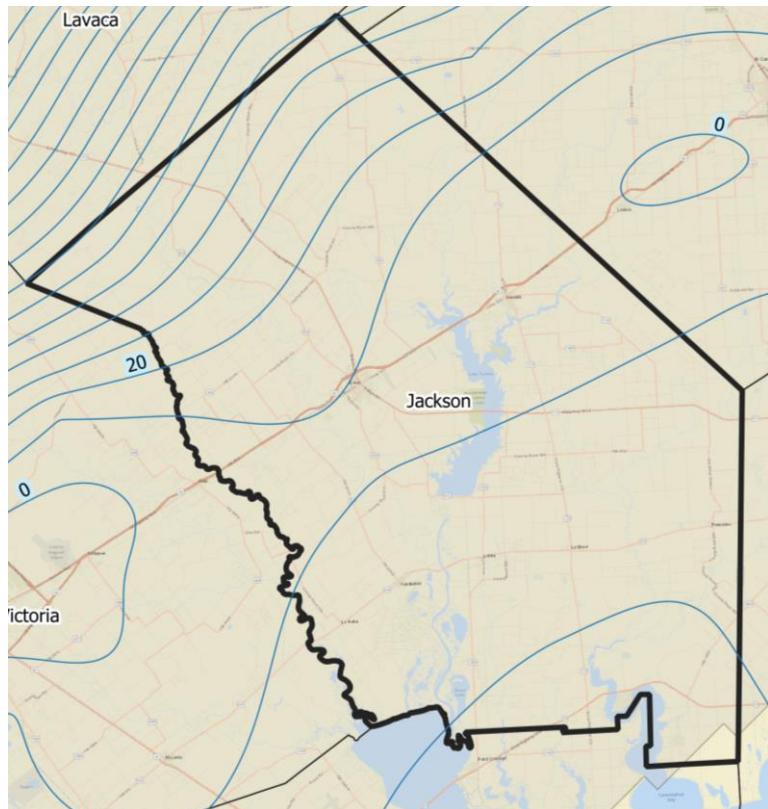

2020

# Contoured Water Levels for Evangeline

2000

2020
